Serial No. : 10/053,535  
Filed : January 15, 2002  
Page : 2

Attorney's Docket No.: 13681-003002

Add claims 70 to 83 as follows:

70. (New) The method of claim 69, wherein the composition comprises carbon monoxide at a concentration of at least 50 ppm.

71. (New) The method of claim 69, wherein the composition comprises carbon monoxide at a concentration of at least 100 ppm.

72. (New) The method of claim 69, wherein the composition comprises carbon monoxide at a concentration of at least 250 ppm.

73. (New) The method of claim 69, wherein the composition comprises carbon monoxide at a concentration of about 50 ppm to about 500 ppm.

74. (New) A gaseous mixture comprising (a) at least 98% oxygen gas and (b) an amount of carbon monoxide gas effective to reduce in a patient hyperoxic lung injury caused by inhaling a gaseous composition at least 98% of which is oxygen.

75. (New) The mixture of claim 74, wherein the mixture comprises carbon monoxide gas at a concentration of at least 50 ppm.

76. (New) The mixture of claim 74, wherein the mixture comprises carbon monoxide gas at a concentration of at least 100 ppm.

77. (New) The mixture of claim 74, wherein the mixture comprises carbon monoxide gas at a concentration of at least 250 ppm.

78. (New) The mixture of claim 74, wherein the mixture comprises carbon monoxide gas at a concentration of about 50 ppm to about 500 ppm.

Attorney's Docket No.: 13681-003002

79. (New) A method of treating a patient in need of a high concentration of oxygen, comprising:

identifying a patient in need of a high concentration of oxygen; and  
administering to the patient the gaseous mixture of claim 74.

80. (New) The method of claim 79, wherein the mixture comprises carbon monoxide gas at a concentration of at least 50 ppm.

81. (New) The method of claim 79, wherein the mixture comprises carbon monoxide gas at a concentration of at least 100 ppm.

82. (New) The method of claim 79, wherein the mixture comprises carbon monoxide gas at a concentration of at least 250 ppm.

83. (New) The method of claim 79, wherein the mixture comprises carbon monoxide gas at a concentration of about 50 ppm to about 500 ppm.

Attorney's Docket No.: 13681-003002

## APPENDIX

42. (Reiterated) A method of treating a disorder secondary to or resulting in oxidative stress to a patient, comprising:

identifying a patient suffering from a disorder secondary to or resulting in oxidative stress; and

administering to the patient an effective amount of a composition comprising carbon monoxide, wherein the disorder is selected from the group consisting of: emphysema, bronchitis, adult respiratory distress syndrome, cystic fibrosis, pneumonia, interstitial lung disease, primary pulmonary hypertension, secondary pulmonary hypertension, Parkinson's disease and Alzheimer's disease.

43. (Reiterated) The method of claim 42, wherein the disorder is emphysema.

44. (Reiterated) The method of claim 42, wherein the disorder is bronchitis.

45. (Reiterated) The method of claim 42, wherein the disorder is cystic fibrosis.

46. (Reiterated) The method of claim 42, wherein the disorder is pneumonia.

47. (Reiterated) The method of claim 42, wherein the disorder is interstitial lung disease.

48. (Reiterated) The method of claim 42, wherein the disorder is Parkinson's disease.

49. (Reiterated) The method of claim 42, wherein the disorder is Alzheimer's disease.

50. (Reiterated) The method of claim 42, wherein the disorder is adult respiratory distress syndrome.

Applicant : Augustine M. K. Choi et al.  
Serial No. : 10/053,535  
Filed : January 15, 2002  
Page : 5

Attorney's Docket No.: 13681-003002

51. (Reiterated) The method of claim 42, wherein the disorder is primary pulmonary hypertension.

52. (Reiterated) The method of claim 42, wherein the disorder is secondary pulmonary hypertension.

53. (Reiterated) The method of claim 42, wherein the composition is administered as an inhaled gas.

54. (Reiterated) The method of claim 53, wherein the gas is administered as a mixture comprising carbon monoxide, nitrogen and oxygen.

55. (Reiterated) The method of claim 54, wherein the concentration of carbon monoxide in the mixture is monitored with a carbon monoxide analyzer.

56. (Reiterated) The method of claim 42, wherein the patient is a human.

57. (Reiterated) A method of treating asthma in a human patient, comprising:  
identifying a patient suffering from asthma; and  
administering to the patient an effective amount of a composition comprising carbon monoxide.

58. (Reiterated) A method of treating asthma in a patient, comprising:  
identifying a patient suffering from asthma; and  
administering to the patient an effective amount of a composition comprising carbon monoxide, wherein the composition comprises about 0.0001% to about 0.25% carbon monoxide.

59. (Reiterated) The method of claim 58, wherein the patient is a human.

Applicant : Augustine M. K. Choi et al.  
Serial No. : 10/053,535  
Filed : January 15, 2002

Attorney's Docket No.: 13681-003002

60. (Reiterated) A method of treating cancer in a patient, comprising:

identifying a patient suffering from cancer; and

administering to the patient an effective amount of a composition comprising carbon monoxide, wherein the cancer is selected from a group consisting of: cancer of the stomach, colon, rectum, liver, pancreas, lung, kidney, cervix uteri, corpus uteri, ovary, prostate, testis, bladder, skin, brain/central nervous system, head, neck, mouth, esophagus, larynx and pharynx; Hodgkins disease; non-Hodgkins leukemia; sarcoma; choriocarcinoma; and lymphoma.

61. (Reiterated) A method of treating cancer in a human patient, comprising:

identifying a patient suffering from cancer; and

administering to the patient an effective amount of a composition comprising carbon monoxide, to thereby treat cancer in the patient.

62. (Reiterated) A method of treating inflammation in a patient, comprising:

identifying a patient suffering from inflammation of at least one organ selected from a group consisting of: kidney, brain, heart, liver, spleen, skin and lung; and

administering to the patient an effective amount of a composition comprising carbon monoxide, wherein the inflammation is of a type selected from a group consisting of: acute, allergic, alterative, atrophic, catarrhal, croupous, fibrinopurulent, fibrinous, immune, hyperplastic, proliferative, subacute, serous and serofibrinous inflammation.

63. (Reiterated) A method of treating inflammation in a human patient, comprising:

identifying a human patient suffering from inflammation of at least one organ selected from a group consisting of: kidney, brain, heart, liver, spleen, skin and lung; and

administering to the patient an effective amount of a composition comprising carbon monoxide, to thereby treat inflammation in the patient.

64. (Reiterated) A method of treating inflammation in a patient, comprising:

Applicant : Augustine M. K. Choi et al.  
Serial No. : 10/053,535  
Filed : January 15, 2002  
Page : 7

Attorney's Docket No.: 13681-003002

identifying a patient suffering from or at risk of inflammation of at least one organ selected from the group consisting of: kidney, spleen and skin; and

administering to the patient an effective amount of a composition comprising carbon monoxide, to thereby treat inflammation in the patient.

65. (Reiterated) A method of treating inflammation in a patient, comprising:

identifying a patient suffering from or at risk of sepsis; and

administering to the patient a composition comprising carbon monoxide in an amount effective to reduce or prevent inflammation secondary to sepsis.

66. (Reiterated) A method for promoting wound healing in a patient, comprising:

identifying a patient suffering from a wound; and

administering to the patient an amount of carbon monoxide sufficient to promote wound healing in the patient.

67. (Reiterated) A method of treating sepsis in a patient, comprising:

identifying a patient suffering from or at risk of sepsis; and

administering to the patient a composition comprising carbon monoxide in an amount effective to treat sepsis in the patient.

68. (Reiterated) A method of treating arthritis in a patient, comprising:

identifying a patient suffering from or at risk for arthritis; and

administering to the patient a composition comprising carbon monoxide in an amount effective to treat arthritis in the patient.

69. (Amended) A method of treating a patient to reduce hyperoxic lung injury, comprising:

identifying a patient suffering from or at risk for hyperoxic lung injury; and

Applicant : Augustine M. K. Choi et al.  
Serial No. : 10/053,535  
Filed : January 15, 2002  
Page : 8

Attorney's Docket No.: 13681-003002

administering to the patient a composition comprising carbon monoxide in an amount effective to reduce hyperoxic lung injury.

70. (New) The method of claim 69, wherein the composition comprises carbon monoxide at a concentration of at least 50 ppm.

71. (New) The method of claim 69, wherein the composition comprises carbon monoxide at a concentration of at least 100 ppm.

72. (New) The method of claim 69, wherein the composition comprises carbon monoxide at a concentration of at least 250 ppm.

73. (New) The method of claim 69, wherein the composition comprises carbon monoxide at a concentration of about 50 ppm to about 500 ppm.

74. (New) A gaseous mixture comprising (a) at least 98% oxygen gas and (b) an amount of carbon monoxide gas effective to reduce in a patient hyperoxic lung injury caused by inhaling a gaseous composition at least 98% of which is oxygen.

75. (New) The mixture of claim 74, wherein the mixture comprises carbon monoxide gas at a concentration of at least 50 ppm.

76. (New) The mixture of claim 74, wherein the mixture comprises carbon monoxide gas at a concentration of at least 100 ppm.

77. (New) The mixture of claim 74, wherein the mixture comprises carbon monoxide gas at a concentration of at least 250 ppm.

78. (New) The mixture of claim 74, wherein the mixture comprises carbon monoxide gas at a concentration of about 50 ppm to about 500 ppm.

Applicant : Augustine M. K. Choi et al.  
Serial No. : 10/053,535  
Filed : January 15, 2002  
Page : 9

Attorney's Docket No.: 13681-003002

79. (New) A method of treating a patient in need of a high concentration of oxygen, comprising:

identifying a patient in need of a high concentration of oxygen; and  
administering to the patient the gaseous mixture of claim 74.

80. (New) The method of claim 79, wherein the mixture comprises carbon monoxide gas at a concentration of at least 50 ppm.

81. (New) The method of claim 79, wherein the mixture comprises carbon monoxide gas at a concentration of at least 100 ppm.

82. (New) The method of claim 79, wherein the mixture comprises carbon monoxide gas at a concentration of at least 250 ppm.

83. (New) The method of claim 79, wherein the mixture comprises carbon monoxide gas at a concentration of about 50 ppm to about 500 ppm.
